

SUE Speaks Recommends...

Beyond The Brain is the world's premier conference series exploring new research on whether and how consciousness and mind extend beyond the physical brain and body, and this year the entire conference is happening online. This year's event covers science and spiritual practices, the boundary between neuroscience and mystical experience, transpersonal psychology, death and after-death communication, consciousness in relation to the brain and the universe, and the relationship between science and spirituality. There will also be an experiential session on each day.

Early-bird discount will expire on September 30th!

The Scientific & Medical Network presents:
An Evening Webinar with Anne Baring
Wednesday, October 14th, 11:30 a.m. – 1:30 p.m. PST
How can we renew our sacred connection to the Earth?

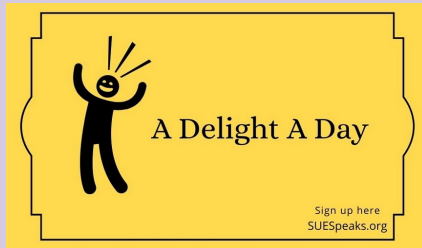

Anne Baring is one of the wisest women in the world. She has explored how we moved from being humans living in a predominantly lunar culture who were closely aligned with the phases of the moon and the rhythm of the cosmos and the earth's life, to what she calls the solar era when we objectified god as being outside ourselves and the sun became the predominant influence. During this era, we began to control and eventually dominate nature instead of living in tune with its rhythms and learning from its essential harmony. As this happened, men began to see themselves as above women, in control of women, whose voices were effectively silenced for several thousand years. If we can understand the influences which shaped our history, we are more able to respond to the gravity of the crisis that confronts us where our very survival is at stake. There couldn't be a more important presentation.

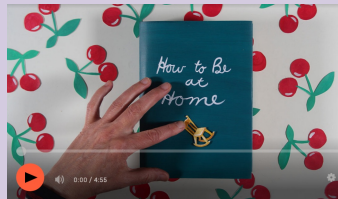

If you sign up for the [SMN mailing list](#), they will keep you informed about this and about other offerings including free Zoom gatherings for members, which I've been for a long time and highly recommend.
